Les Lacs Pond Improvement Project Update

The Les Lacs Pond Improvement project is largely on schedule. However, rain has affected the contractor for 14 days since the project began, causing some delays in deepening the pond and hauling off excavated material.

To date, 3,691 cubic yards (CY) or 160 truckloads of sediment and 13,635 CY or 592 truckloads of excavated material have been removed from the site. It is anticipated that the completion of pond deepening and material removal for the clay liner will require eight more dry working days.

The next phase will involve importing local clay for the liner and starting construction of the pond edge. Click the drone video above to see the latest progress and current activity.

There are several ways to follow the project's progress:
